Private Higher Education in Australia Report 2018

Wells
Advisory

About this report

This Report provides a foundational overview and analysis of private higher education in Australia.

It is designed to be a building block report for future reports in this Series and will help you answer the following questions:

- What is the market size and growth rate in terms of students and revenues for private HE, in total and for key segments?
- What are the main price relativities between private HE and the broader market?
- How many and which private providers are poised for self-accrediting authority and/or university status?
- What are the key market factors driving the broader market?
- What are the major regulatory frameworks that apply to HE in Australia, and how might these operate as constraints on the business?
- What is the profile of existing players in private HE in terms of regulatory approvals, scale and scope of operations, and geographic location?
- Which private providers are on the list of registered entities and which of those have CSP places; FEE-HELP, and/or self-accrediting authority; and
- What are some of the key developments and opportunities in private HE?

Who should buy this report?

This Report is designed for those interested in private higher education, in particular:

- Prospective buyers or entrants in the higher education system;
- Higher Education Board Members and Senior Executives seeking an authoritative resource;
- Directors of compliance or quality assurance within higher education providers; or
- Those wanting to learn more about the private Australian higher education sector.

Sample from Report: Figure 20 – Private higher education: Total student EFTSL by provider type, 2012 – 2016

About the Private Higher Education Series

The Australian higher education sector operates within a complex landscape, driven and impacted by both domestic and global factors.

While much is written about the public universities and the TAFE sector in Australia, to date, reporting of the private segment of the market has been sparse and incomplete.

The Private Higher Education Series seeks to redress this imbalance.

- The Series provides a useful synthesis of information and offers new insights, including:
- The dynamics, profile and opportunities in the private higher education market;
- The legislative and regulatory higher education environment regulatory environment;
- Market forecasts for the higher education sector; and
- Market analysis by course offerings and discipline areas that dominate the private higher education sector

Our first report – **Private Higher Education in Australia 2018** – is now available.
